Quick Tips to Evaluate Your Dog's Health

by **Trista Reeder, M.S., Ph.D.**

Dog Nutrition/Animal Science

Springtime Quality Control Manager

WEIGHT

Is your pet carrying too much weight? Leaner pets tend to be healthier and have fewer diseases. However, obesity can lead to diseases such as diabetes, arthritis, and heart conditions among others.^{1,2,3,4,5} In addition, that added weight could be aggravating already sore joints and potentially causing further damage. If your dog is too large to weigh at home, most veterinarians will allow clients to come in and check their pets' weight without an appointment or fee.

BODY CONDITION

Does your pet have a waist? Most people don't think about it, but your pet should have an hourglass figure. Stand over your dog and look down. If your dog's waist doesn't narrow at least a little bit before the hips, he/she may be carrying extra pounds. Now we look at the pet from the side—does his/her belly start to "tuck" behind the rib cage? You should be able to feel—but not see—your pet's ribs. If your beloved furry friend is "barrel" shaped, then it may be time to put the treats away. Please remember—you're the one in control of filling the food bowl, your pet is only in control of emptying it.

EARS

Looking down into your pet's ears—they should be clean and pale pink (or skin colored depending on breed and coat color). There should be no brown/black/waxy build-up. The ears should also be odor-free. Chronic ear goo could be another sign of allergies and you may want to consider upgrading the diet or adding a supplement containing a natural antihistamine such as bee pollen or spirulina (**Longevity**[™], **Fresh Factors**[™], etc.).

SKIN APPEARANCE & ITCHING

Itchy skin can be caused by a variety of factors. The first step is to ensure that your pet does not have fleas. By using a simple flea comb and running it through your dog's fur, you can check for fleas or "flea dirt." It's important to get the comb down to the skin as you brush it through, checking for tiny fleas or bits of black flea dirt. If you find either of these, a bath and daily **Bug Off Garlic** would be in order. Changing/cleaning the bedding would also be helpful.

If you don't find anything, it is possible your pet is suffering from allergies or simply dry skin. When you part your pet's fur and examine the skin underneath, the skin should be relatively pink (or comparable color, depending on coat color) and even-toned without any redness, bumps, flakes, or patches of moisture. You can take a good sniff while you're at the skin level – does it smell like "dog" or do you smell a yeasty or infection-type smell? These are further signs of allergies, and you might want to evaluate your pet's diet and perhaps consider upgrading. Allergy symptoms can also be alleviated by adding either **Fresh Factors™** or **Longevity™** to your pet's meals. When fed daily, the all-natural antihistamines in these two products provide lasting relief against inflamed, irritated skin. For dry, itchy skin, consider adding **Omega 3-6-9™** or **Skin & Coat** to the diet. Watch as the dry, itchy skin repairs itself and your pet's coat shines with a new luster. Let's think of it like this: Someone who eats fast-food hamburgers and fries every day isn't going to have perfect skin and hair, but if they improve their diet, their acne and greasy hair will clear up.

STOOL APPEARANCE

Stool appearance and consistency are important signs of your pet's overall health. Your pet's stools should be solid and formed but not hard. Coloring will vary depending on what is being fed (if a variety goes in, a variety will come out). You do not want overly soft stools. Also keep an eye open for parasites. Regular stool sample checks by your veterinarian will ensure your pet remains worm-free.

Springtime's Dog Product Guide

Puppyhood

The three most popular live food supplements that breeders request for their puppies to stay on are **Fresh Factors™** (pg. 8), **Bee Pollen™** (pg. 36) or **Longevity™** (pg. 28). These products promote and protect healthy joints and immune system, coat, skin, and digestion* in growing dogs. **Bug Off Garlic Chewables** (pg. 42) or **Bug Off Garlic Granules** (pg. 43) for flea and tick protection and **Stress Free Calmplex™** (pg 34) for puppy training are also favorites.

DOG AGE

DOG COMFORT NEEDS

Prime of Life

Is your dog in good health and you want to keep him/her that way? The products below will help you do that!

CHEWABLE TABLETS

- ▶ 1st choice for all-around benefits: **Fresh Factors™** (pg. 8)
- ▶ Add **Joint Health Chewables™** (pg. 14) for specific mobility issues*
- ▶ **Combo** (pg. 18) – an easy way to order both products together

POWDERED FORMULAS

- ▶ **Bee Pollen™** – miracle food powerhouse (pg. 36)
- ▶ **J-Flex Concentrate™** – economical joint health (pg. 26)
- ▶ **Longevity™** – centerpiece whole food formula (pg. 28)

Kibble Diets for Dogs

Best choice for kibble only, but can be used in any feeding program.

Chewable tablets break easily into quarters for small dogs and picky eaters.

CHEWABLE TABLETS

Advanced Hip & Joint Chewables™ – best comfort management	..20
Bug Off Garlic Chewables – high sulfur, air-dried	..42
Combo – easy economical upgrade	..18
Fresh Factors™ – whole food rejuvenator	..8
Joint Health Chewables™ – quick, powerful chewables	..14
Omega 3-6-9™ – complete full spectrum	..37
Stress Free Calmplex™ – herbal/vitamin formula	..34

OIL FORMULA

Skin & Coat – “Super Seven” oil blend	..38

Seniors

Advanced Hip & Joint Chewables™ (pg. 20) or **Joint Health Formula™** (pg. 27) powder are the strongest tools for advanced comfort issues* and long-term natural therapy, and may be added to any **Springtime** supplements, such as **Longevity™** (pg. 28).

Adulthood

Using **Longevity™** (pg 28) or the **Combo: Fresh Factors™** with **Joint Health Chewables™** (pg 18) keeps adult dogs fit and agile, while keeping their joints lubricated, flexible and healthy.* These products can be generously dosed for sport, competition, breeding or while recovering from injuries. **Bug Off Garlic Chewables** (pg. 42) or **Bug Off Garlic Granules** (pg. 43) provides a 24-hour shield against fleas, ticks, mosquitoes, gnats, etc.

DOG AGE

DOG COMFORT NEEDS

Slow-Down Stage

Has your pet slowed down compared to what he or she used to do? If so, please begin to double or triple the dosages on the products in the Prime of Life (left).

Comfort Management

Does your pet avoid stairs completely? Does your pet cry out at times? If so, please add products below to your supplement regimen and build up to double or triple doses if required:

CHEWABLE TABLETS

▶ **Advanced Hip & Joint Chewables™** – best comfort management (pg. 20)

POWDERED FORMULAS

▶ **Joint Health Formula™** – quick, most powerful (pg. 27)

Moist Diets for Dogs

Canned food with kibble, canned only, home cooked, etc.

Add warm water and stir for a delicious stew!

Springtime

Fresh Factors™

A great tasting all natural supplement for dogs of all ages.

Dogs might not use words, but they do “talk” to their owners and let them know when they are happy, depressed, in pain, or feeling good. And dog owners love to talk to one another about their dogs. The result has been a groundswell of friend referrals that over the years has made **Fresh Factors™** their overwhelming choice for a convenient, great tasting, treat/supplement that keeps everybody happy and feeling good.

PRODUCT HIGHLIGHTS

- ▶ Promotes strong hips and joints*
- ▶ Helps dry up and heal hot spots*
- ▶ Restores bloom in older dogs*
- ▶ Helps give all dogs a luxurious coat and itch-free skin
- ▶ Easy to feed for young and old

No more limp for boyfriend's dog...

Dear Springtime:

My boyfriend has a Maltese mix called Squeaky, who had a badly atrophied rear leg. His vet told him that a lot of small dogs have a limp, and it's just something they live with (Huh??!!). Since I've had previous experience with **Fresh Factors**, I told him that I knew how to help his dog.

After about 2 months of **Fresh Factors**, there was an obvious difference. The limp was only there at more random steps. After 6 months, the dog didn't hold the leg up anymore, and the leg was growing. After a year, you couldn't tell the difference in size between the "bad" leg and the good one, and Squeaky had stopped limping.

Thank you for making me look good to my boyfriend — and for making such an awesome product!

Lisa Duntley, Arkansas

Squeaky no longer limps!

Customer Corner: Fresh Factors™

Real letters from real people.

“...I’m certain it extended her life and her comfort.”

Dear Springtime:

Amoke was the fifth dog we’ve given **Fresh Factors** to, and I’m certain it extended her life and her comfort. She was adopted from the city pound as a six to nine month old pup. She’d been on **Fresh Factors** since

“She continued to go up and down the steps until the day she died...”

she was about six years old. She continued to go up and down the steps to the back yard until the day she died, at the age of 19 years old, or as the veterinarian told us, 106 in human years.

Phyllis Rude, Alaska

Amoke lived to be 106 in human years!

Diabetic Dog Thriving on Fresh Factors!

Dear Springtime:

Thank you! I was just at the Humane Society getting our 11-year-old black Lab/Border’s blood sugars checked. He’s been diabetic and on insulin for two years. Our life-long vet can’t believe how

“Our life-long vet can’t believe how well Shadow is doing... it’s the Fresh Factors.”

Shadow isn’t letting age or diabetes slow him down.

well Shadow is doing, as he has not gone blind and is really thriving — it’s the **Fresh Factors**. While there, I also recommended it to a woman with a dog she’d just adopted who had a leg that had been broken and set twice. I shared with her that our Humane Society adopted “lame legged” Louie is completely fine, with no leg problems and runs like a pup-champ with a smile!

Thanks again, from our family and our three beloved pups!

Phyllis Nodler, Idaho

"His comfort level is so much better."

Dear Springtime:

Loving the **Fresh Factors!** We knew shortly after we adopted Jax that he had some issues with his back legs. I saw results with Jax's ease of movement within the first few weeks of him taking **Fresh Factors**. His comfort level is so much better. He is acting like the 2-year-old dog he truly is instead of being sore and stiff all the time. He is doing so much better on **Fresh Factors** that we are going to continue him on them in the future.

Thanks for the wonderful product!

Megan, Josh, and "Jax" Spatz, Wisconsin

Jax taking a break from playing in the yard.

"...I won't let them run out again!"

Dear Springtime:

I want to let you know that I had my doggies on these supplements for a while now (**Fresh Factors, Bug Off Garlic Chewables, and Omega 3-6-9**), and I ran out about a month ago. Within a few weeks of stopping their "goodies,"

both of my dogs started shedding heavier (I have Siberian Huskies so that's a BIG deal!) and have gone back to their former itchy selves. It's not quite as bad as it was before because I am feeding an ultra-high quality dog food now, but the difference in them when they are on your prod-

"...the difference in them when they are on your products versus being off your products is very significant."

ucts versus being off your products is very significant. They still have beautiful coats when off, but they also have less shine.

I am sold, and I won't let them run out again!

Dixie & Ken Brooks, Georgia

The Brooks' Siberian Huskies aren't shedding as much!

* This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Customer Corner: Fresh Factors™ (cont.)

Real letters from real people.

Near Death, Recovered, Now 15½

Dear Springtime:

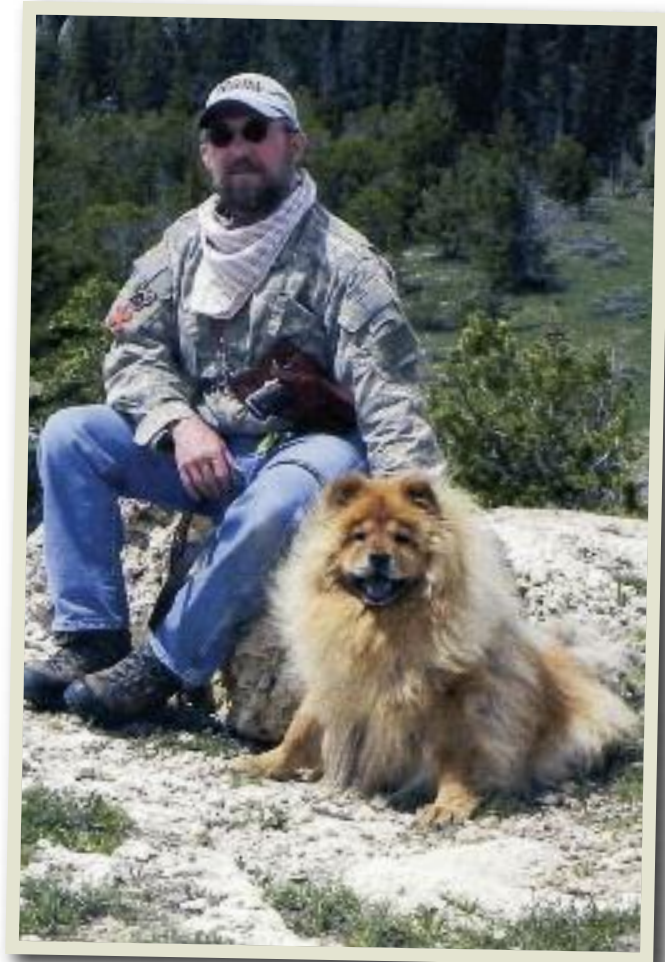

I want to thank you for making a wonderful product. My wife and I have a 15½-year-old Chow Chow named Peekaboo. A little over two years ago her veterinarian thought she had just a few days to live. She had stopped eating for over a week and after some x-rays he told us that it looked as though she had stomach cancer. She was vomiting and passing blood. Things looked really bad for our girl. We had tried so many different things trying to get her to eat with no success.

After trying everything I could think of, I remembered **Fresh Factors**. Something unbelievable happened

“She is over 110 years old in dog years and still doing well. She acted like a puppy last summer when we took her to the Bighorn Mountains...”

when she got the nourishment from the **Fresh Factors** — our girl wanted to live again!

Now, over two years later she is still doing very well, getting two **Fresh Factors** per day ever since. She is over 110 years old in dog years and still doing well. She acted like a puppy last summer when we took her to the Bighorn Mountains for a week. There is nothing like seeing your very old dog enjoy life like she did in her younger years. I don't know how much more time she has, but I know for a fact that **Fresh Factors** has given us nearly 2½ quality years we almost didn't have.

Peekaboo, the 15½-year-old "puppy," is still hiking.

You folks make products that give so much more than you know. The extra time we've had with Peekaboo is something we will cherish forever!

Thank you!

Mike, Alta, and "Peekaboo" Ludlow, Wyoming

Surgery No Longer Necessary

Dear Springtime:

At six months, my Field Spaniel, Emma, could hardly walk because of hip problems. The products prescribed by her vet made her ill and did not help her hips at all. I contacted a friend, who told me all about **Springtime**. After two weeks on **Fresh Factors**, Emma was like a new dog.

“After two weeks on Fresh Factors, Emma was like a new dog.”

Emma (center) no longer has hip pain.

At 1½ years, her condition deteriorated again, and I added **Joint Health Chewables**. Her orthopedic vet says she is doing so well at 2½ years, he is not doing the surgery he felt was inevitable. I have now added **Bug Off Garlic Chewables** also. My Welsh Springer, Maggie, also loves **Fresh Factors** to help with her allergies.

I have recommended your products to many people. I love your company — both the service and products. Thank you, thank you, thank you.

Kathy Townsend, Virginia

“...he has always been so very healthy.”

Dear Springtime:

I wanted you to know that after 20 years, I'm still a **Springtime** friend and customer. I've told so many people about **Springtime**, and I'm so proud of your products. I have attached a picture of George, my sweet boy. Isn't he the best? He's a gorgeous five-year-old, brindle-and-white Bulldog, and he has always been so very healthy. He has been on **Fresh Factors**, **Joint Health Chewables**, and **Bug Off Garlic Chewables** since he was ten weeks old. Thank you, again, for being who you are!

Kate Mulderig, North Carolina

Kate's "sweet boy," George

Springtime's unique formulas can provide concentrated live enzymes and raw food factors for your pets.

Fresh Factors™ – singular most popular live food chewable for dogs of all ages - coat, skin, and joints.*

Fresh Factors™ and **Joint Health Chewables™** Combo goes further for powerful joint and pain management.*

Fresh Factors™, **Joint Health Chewables™** and **Spirulina Wafers™** chewable combination is the closest to the powdered **Longevity™** formula.

Springtime

"...I, my wife, and the vet are absolutely astonished!"

Dear Springtime:

Approximately 4 months ago, Abby, our 6-year-old American Cocker Spaniel, had surgery for torn anterior cruciate ligaments on both legs. She healed nicely, but I could tell she was stiff because of the way she moved and had trouble getting up. She was just not the same hippity-hoppity girl. I obtained your **Joint Health Chewables**. After 6 weeks of treatment, she has responded so favorably that I, my wife, and the vet are absolutely astonished!

You have given us our old Abby back. She just keeps getting better and better!

Gary Toth, Kentucky

Real letters from real people.

“...not so much as a limp!”

Dear Springtime:

My Aussie mix, was tripod two winters in a row. **Joint Health Chewables** put him back on all fours for the next six years of his life with not so much as a limp! We have new puppy now named Jonah.

“Springtime’s products have truly enhanced the enjoyment of pet companionship...”

Springtime’s products have truly enhanced the enjoyment of pet companionship because it has proven to extend the life and happiness of each pet I have owned.

Aaron Zipp, New York

Jonah baby-sitting!

"...happy miracle pills!"

My Rottweiler Diva hurt her paw, and she stopped walking. She was in pain, limping all the time. It was so sad. The vet told me nothing was broken, but something was wrong. A friend who is a breeder recommended your products. I ordered **Fresh Factors** and **Joint Health Chewables** right away, and within one day, Diva was back to her normal spunky self. I call your supplements her happy miracle pills! Thank you so much for making such an awesome quality product and for caring for animals!

Sandy Tapia, Washington

Sandy & Diva

"No one believes he's almost 11."

I just wanted to thank you so much for making your **Joint Health Chewables**. My Jake is almost 11 years old, and your supplements keep him healthy, moving freely, and strong. There is a light in his eyes of youth and vigor. No one believes he's almost 11. Two pills daily of the **Joint Health Chewables** have given him the highest quality of life. Many, many, many thanks!

Stephanie and "Jake" Erwin, Texas

Jake is all smiles at 11 years old!

"...a profound change with her within only two weeks."

Dear Springtime:

I wanted to write to you and thank you for the years of pain relief that your product, **Joint Health Chewables**, gave my beloved German Shepherd Hilda. Hilda developed hip and arthritis issues around the age of two years old.

After much research, I ordered Hilda **Joint Health Chewables** and saw a profound change with her within only two weeks. She was able to run again,

Hilda enjoyed a pain-free life.

"She was able to run again, climb stairs (she didn't even want to go up one step before starting her on the product)..."

climb stairs (she didn't even want to go up one step before starting her on the product), enjoyed swimming daily, and lived a good, pain-free life.

I kept Hilda on the **Joint Health Chewables** for the remaining seven years of her life. I truly believe that without your product, Hilda would not have had the quality of life she did.

This product made such a miraculous difference in Hilda, and I have recommended your products to every pet owner I know. I don't know how to thank you.

Sincerely,

Nancy Davis, Michigan

Combo - Fresh Factors™ & Joint Health Chewables™

An economical combination of two of our most popular supplements for dogs.

Combining Fresh Factors™ and Joint Health Chewables™ gives dogs a powerful one-two punch for all their nutritional needs. They get **Fresh Factors™** for broad spectrum nutrition, plus **Joint Health Chewables™** to keep their joints lubricated, flexible, and healthy. Using them together works great.

PRODUCT HIGHLIGHTS

- ▶ Promotes strong hips and joints*
- ▶ Powerful MSM, glucosamine HCL, and chondroitin sulfate
- ▶ Helps give all dogs a luxurious coat and itch-free skin
- ▶ Promotes a playful, upbeat attitude
- ▶ Restores bloom in older dogs*
- ▶ Promotes a mobile, pain free lifestyle*
- ▶ Easy to feed chewables – highly palatable

"She's back to her 4-year-old-self."

I tried tons of different products to help Bella, my 4-year-old black Lab rescue, but none of them worked. She still couldn't jump in bed to cuddle or even climb stairs. My vet was puzzled. A friend gave me a sample of **Fresh Factors** and **Joint Health Chews** to try, and I saw a difference in less than a week. I ordered a set for myself, and now she's doing much, much better. She's back to her 4-year-old self.

I have referred you to my friends with big dogs, and they rave about your products just like I do. I just wanted to thank you with all my heart for these wonderful products!

Stephanie Lohmann & "Bella," Connecticut

When your dog says "ouch," **Springtime Advanced Hip & Joint Chewables™** are the answer. Boswellia extract is, by far, the most potent herbal pain reliever available for dogs. Combined with a generous dose of chondroitin sulfate extract and other high grade ingredients, **Advanced Hip & Joint Chewables™** are a safe and easy tool for advanced comfort issues and long term natural therapy.

PRODUCT HIGHLIGHTS

- ▶ Promotes pain-free mobility*
- ▶ Can provide the enjoyable golden years your dog deserves
- ▶ Desiccated raw beef liver for flavor and nutrition
- ▶ Natural anti-inflammatory*
- ▶ Restores a happy, upbeat attitude in older dogs*

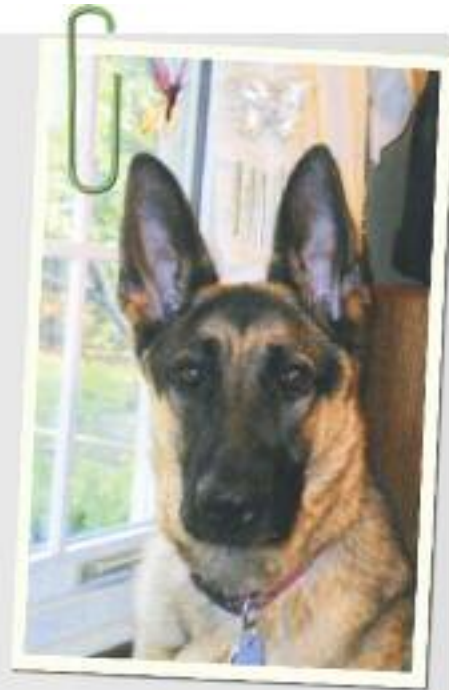

Kasha is like a puppy again!

Dear Springtime:

Our 6½-year-old German Shepherd, Kasha, had severe arthritis in her legs and back. I found your **Advanced Hip & Joint Chewables** and started giving them to her immediately. Within one week, she was acting like the little puppy she was before. The swelling in her legs went down and she is back to playing ball three times a day. We love that this product is all natural and works so well on her. Thank you so much for giving us back our sweet little girl with her energy and spirit.

Sincerely yours,

Judith L. Fenicle, Pennsylvania

Kasha is ready to play!

Customer Corner: Advanced Hip & Joint™

Real letters from real people.

“...acting like a puppy again...”

Dear Springtime:

We really appreciate your help. We are really thankful that we found your products. Our 12-year-old English/Irish Setter mix, Missie, was very sick back in September. We thought we were going to lose her, but thanks to our vet and Missie being such a tough little cookie, she pulled through.

“She can go up and down the steps and get up on the sofa and bed again.”

We had been giving her your **Advanced Hip & Joint Chewables**, but stopped everything during all the intense medications she was on. Then we started it back up again. She then started acting like a puppy

Missie is playing with her pal Lincoln again.

again, playing with our other English setter, Lincoln. She can go up and down the steps and get up on the sofa and bed again. We really trust the quality of your products.

Thanks so much!

Roger & Sandi Bailey, Maryland

Surgery Avoided

Angeline's pug is now pain-free.

Dear Springtime:

My pug is so much more active after taking **Advanced Hip & Joint Chewables** and **Fresh Factors**. She was diagnosed with Grade 1 patellar luxation and my mom told me to try **Advanced**

“She is doing much better and has not needed surgery...”

Hip & Joint Chewables and **Fresh Factors**. She is doing much better and has not needed surgery as her condition has not worsened. My little girl, Moon, and I thank you for your wonderful products for our fine furry friends!

Sincerely,

Angeline Marushin, Nevada

Dear Springtime:

Once again, **Springtime** came to the rescue!
When my eight-year-old, mildly dysplastic, Norwegian Elkhound, Birka, recently started barking at the foot of the stairway and didn't want to come up the stairs, I knew it was time to supplement. In the past, she took the stairs with leaps and bounds, and had always been a very active dog.

After just a few days of giving her **Advanced Hip & Joint Chewables**, she was back to racing up the stairs and jumping with ease. Thanks to **Springtime**, she is my energetic, happy girl again, able to run and play again with our other dog.

Kari Olson, Wisconsin

Birka, the Norwegian Elkhound

"...back to racing up the stairs and jumping with ease."

Miracle Recovery

Dear Springtime:

We use **Advanced Hip & Joint Chewables**. I have a 14-year-old Jack Russell named Pearl that was having trouble getting up and down and walking. She has had many accidents in life; she was run over once (in my driveway), dogs have jumped on her, she has jumped out of a barn because of yellow

"She even runs up the steps going in my front door!"

jackets, and horses have stepped on her. Needless to say, in old age, it has caught up with her.

I thought I would try your product on her, and now I feel bad that I haven't had her on it for years. She is now back to running again, and I have had to chase her a couple of times like the old days! She even runs up the steps going in my front door! It is an amazing product, and I just wanted to let you

Jackie and 14-year-old Pearl.

know I will be ordering another bottle when this is about to run out. Thank you so much for making such a great product. Pearl thanks you, too!

Jackie Cooper, Tennessee

Real Beef Liver: Dried Raw

Beef Liver, a high-grade food, makes Springtime dog products nutrient-dense.

Springtime uses beef liver in generous quantities to make all dog products easy to feed. The Argentinian beef liver is from hormone-free cattle raised in pristine wild areas. Most dogs readily accept Springtime's beef liver flavored chewables. ♦

Nutritional Yeast Culture Is Nutrient-Dense and Enzyme-Active

Springtime chewables contain a nutritious type of yeast culture, called *saccharomyces cerevisiae*, which gives our chewables additional health benefits.

Springtime chooses to use nutritional yeast culture (*saccharomyces cerevisiae*) made by Red Star®, a complete protein and superfood containing 18 amino acids, B-complex vitamins, dietary fiber, as well as many other nutritional components and minerals. Red Star® Yeast, the largest manufacturer of yeast products in North America, has over 50 years of extensive experience in the development and production of nutritional yeast.

Springtime has used Red Star® nutritional yeast exclusively for more than 20 years.

What It Is

Red Star® nutritional yeast is grown specifically for its nutritive value. In addition to protein, dietary fiber, vitamins and minerals, it contains additional functional and beneficial components such as beta-1, 3 glucan, trehalose, mannan and glutathione.

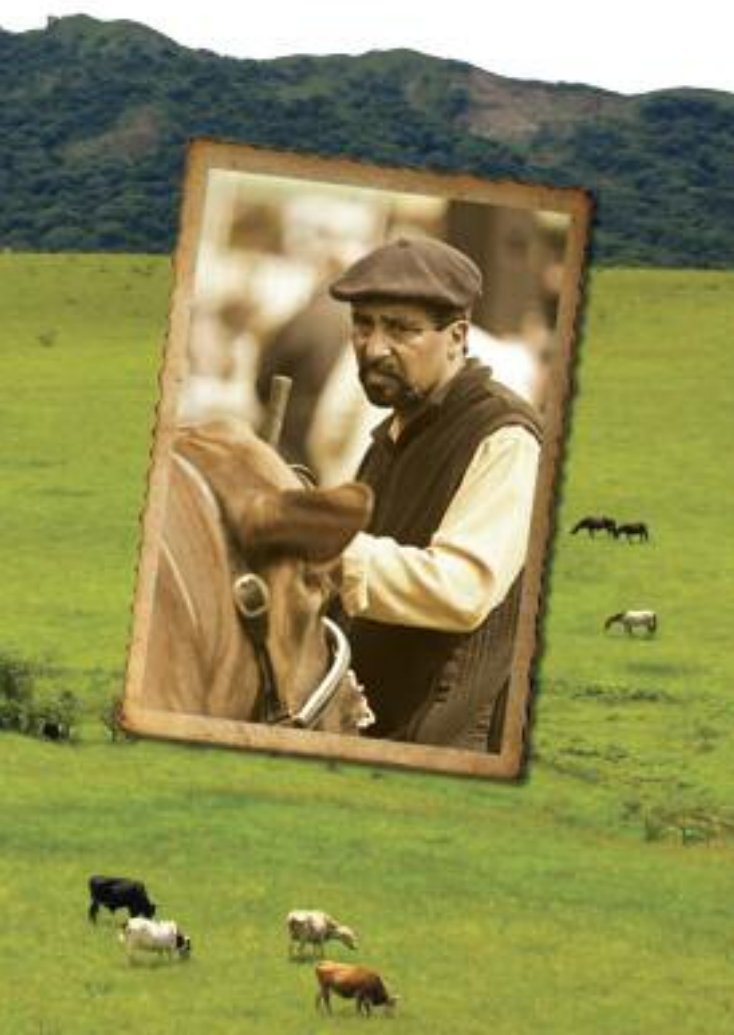

Studies have shown potential health benefits, such as improved immune response and anti-cancer properties.

Studies have shown that these components have potential health benefits such as improved immune response, reduction of cholesterol, and anti-cancer properties. **A special drying process retains live food factors, a unique and valuable quality.**

What It Is Not

Candida yeast infection (*candida albicans*) is a body yeast infection. **Red Star®'s nutritional yeast (*Saccharomyces cerevisiae*) is not found to be a cause of yeast or candida infections.** ♦

J-Flex Concentrate™ for Dogs & Cats

An economical and effective joint supplement.

J-Flex Concentrate™ is a powdered chondroitin sulfate (bovine cartilage extract) for joint health. Customers choose **J-Flex** because it is the most cost-effective product on the market:

- ▶ Chondroitin sulfate with minimum 90% purity
- ▶ A 50-to-1 concentrated extract, as opposed to dried cartilage powder often sold as chondroitin
- ▶ Easy to feed (virtually tasteless and odorless)
- ▶ Promotes cartilage and joint health*
- ▶ Excellent for coat and skin*

J-FLEX CONCENTRATE™

SIZE	PORTIONS	COST/PORTION	TOTAL
★ 6 oz.	336	15¢	\$49.50

★ Available as a free bonus. See page 49.

GUARANTEED ANALYSIS (per lb.)

Chondroitin sulfate, purity min. 90% (bovine cartilage extract) 453,600 mg

Ingredients: chondroitin sulfate.

DIRECTIONS: Up to 1/8 scoop per 20 lb. body weight daily.

Virtually tasteless and odorless. Easy to mix into wet food!

Mr. Dickens, still spry for 22.

22-Year-Old Cat Going On Strong!

Dear Springtime:

Mr. Dickens adopted us 22 years ago. He has outlived both his original master and his adopted master who lived to age 80. He has an annual checkup, teeth get cleaned every few years – no cavities, no extractions ever. ...and while he is a bit slow he has no problem jumping up on the window bench for his breakfast and dinner – breakfast is supplemented with **J-Flex Concentrate**. At the rate he is going, he may well outlast me...

Thanks for carrying this product.

Pat Beauvais, Arizona

Pain Relief for a 9/11 Hero...

Dear Springtime:

Tsunami will be 11 years old in March. Isn't she a beauty? Her first mission after Search and Rescue certification was the World Trade Center in New York City — she never flinched and attacked the job like a pro. We still do little searches because she loves it.

She has joint issues in her left elbow from Lyme disease, but the **Joint Health Formula**, allows her to move fluidly and pain-free.

Semper Fido,

Marilyn Wilson, New York

Springtime

Longevity™

Powerful all natural ingredients combine to invigorate and detoxify your dog.

**BUY TWO
GET ONE FREE
SAVE 33%**

Longevity™ for dogs is a powdered formula to be mixed into wet food feeding programs. This product combines the best principles of **Fresh Factors™** plus **Joint Health™** but goes even further. This is the strongest rejuvenating product we have for dogs. It is especially useful for daily detoxification, which is extremely important considering the dangers of common household chemicals and environmental toxins. **Bug Off Garlic** is highly complementary for best long-term protection.

PRODUCT HIGHLIGHTS

- ▶ Provides key "live food" factors impossible to find in commercial dog foods alone
- ▶ Hip & joint health – strengthens connective tissues, keeps them elastic, resilient, and lubricated*
- ▶ Wonderful blood builder & detoxifier – helps keep athletic dogs at their peak*
- ▶ Can turn back the clock for older dogs with rapid visible results
- ▶ Powerful, whole food antioxidants & immune stimulants*
- ▶ Will produce a brilliant coat with healthy, itch-free skin

Amazing Results for Sled Dogs

Dear Springtime:

I recently started all 28 of my racing sled dogs on **Longevity**. All 28 love it. Even my picky eaters are licking their bowls clean!

After only a few days, I could see an improvement in all their coats. After 3 weeks, the difference in appearance is amazing, and the dry, itchy skin is starting to heal.

Thanks for such a great product. You now have another loyal customer.

Charlotte Mooney,
Klondike Dreams Sled Rides, Montana

Longevity Helps Rehab a Badly Neglected Rescue

Dear Springtime:

Sam, my rescued yellow Lab, came from a horrific situation (owner surrender/neglect). The vets deemed him a “one” on a scale of one to ten, with little chance of survival due to his malnutrition (42 lbs.) and age.

His physical issues included: severe emaciation, mysterious wounds, rotten teeth, hip/leg issues, lack of muscle mass, and within two months of intake, bloat (which almost killed him). His

“Longevity... has not only helped him retain mobility, but also has helped his coat and overall body weight, as well as his fickle digestion.”

coat/hair was like straw where it covered his body, and his stomach and nose had no hair on it at all. His head was sunken, and you could see every rib and his spine.

Sam is a miracle dog surviving all odds. He weighs 64 lbs. now! I can attest that the combination of love, quality food, and **Springtime** products helped in making a difference! One of the standard products he consumes is **Longevity**, which has not only helped him retain mobility, but also has helped his coat and overall body weight, as well as his fickle digestion. During his rehab, all of his hair/fur fell out and has grown back soft and beautiful.

Sam is now technically a failed foster, and he will live out his life with me. I have truly enjoyed every minute with this special dog. Your products have been a life-saver for my boy!

Thanks, **Springtime!**

Liz Nicholas, Georgia

Sam, before Longevity...

...Sam, after a lot of love & Longevity!

Only the Best for This Best in Show!

Dear Springtime:

I cannot say enough wonderful things about your products. We use **Longevity** and have used it for years. Some of our dogs are getting older and are still going strong, with hunting, swimming and performance. I feel so comfortable that you use top-grade products and want only the best for our dogs. Having the #1 dog in the country year after year, we depend on companies like you to help our vision. Thank you for all you do. What a fabulous company who truly has their heart in the right place: the betterment and health of the dogs!

Stacy McWilliams, Pennsylvania

Stacy McWilliams (center) with two of her show dogs, TJ (left) and Pixie (right).

Longevity Helps Charley Make a Comeback

Dear Springtime:

I just wanted to thank you for your great products! My oldest Dalmatian, Charley, started going downhill fast. I wasn't sure he was going to make it until Thanksgiving. He was losing weight fast (despite being fed almost 3,000 calories a day), and his general health was failing.

"...he is gaining weight, has more energy, is no longer depressed, and overall looks better than he did six months ago."

I didn't want to lose him, so I started to research products that might help me improve his health. I remembered **Springtime**, and I got on the website to place an order of **Longevity**.

Charley has made a miraculous recovery!

I am amazed! Not only has Charley made it to the New Year, but he is gaining weight, has more energy, is no longer depressed, and overall looks better than he did six months ago. I didn't know if he would make it to his 14th birthday, but I am hopeful now!

Amy O'Brien, Pennsylvania,
Dill Valley Dalmatians & Revival Beagles

Customer Corner: Longevity™

Real letters from real people.

“...I have weaned her off of ALL of her medications...”

Dear Springtime:

I just want to say Thanks! My 11-year-old, 8-lb. Toy Rat Terrier, Annabelle, was on Gabapentin, Tramadol and Metacam for a pinched nerve in her back. She would barely walk, even in the house. I found out about **Longevity** when searching for alternative methods for handling chronic pain.

“She is running around, playing fetch, and acts younger than ever.”

Now, 2 months later, I have weaned her off of ALL of her medications and give her **Longevity** twice a day. She is back to her normal self and back to her long walks around the neighborhood. She is running around, playing fetch, and acts younger than ever. Her coat looks beautiful, and her grass allergies are not as severe this year either.

I swear your product is a miracle cure. I can't thank you enough for giving our Annabelle her life back.

With best regards,

Heidi Petras, Maryland

Annabelle, the 11-year-old Toy Rat Terrier, feels younger than ever!

“...the best supplement in existence.”

Donna's guys are looking, feeling, and smelling great.

Dear Springtime:

All of my dogs are so happy that I discovered **Springtime** ten years ago. I feed all of them **Longevity** and **Bug Off Garlic Granules**. One time, I was running low on **Longevity**, so I fed it only to my younger dogs. Well, within a few days, my old guys' coats were dull, and they took naps instead of their usual alert, playful routine. Since then, I have never run low on **Longevity**, which I believe is the best supplement in existence. ALL of my dogs look, feel, and smell fresh! **Springtime**, we all love you!

Devoted **Longevity** Fan,

Donna Radich, North Carolina

An Anti-Aging Diet With Safe & Effective Live Food

Feeding Springtime chewables and powder products is easy!

Springtime customers love their pets. Many have developed their own raw and/or home-cooked feeding programs for their dogs. Unfortunately, most of us do not have the time to do this. Below is a simple feeding program that provides the best of a raw food diet without the extra work.

- ▶ Measure out a high quality kibble.
- ▶ Measure out appropriate helpings of Springtime products.
- ▶ Measure out a small amount of high grade canned dog food.
- ▶ Stir in enough lukewarm water to make a delicious gravy.
- ▶ Mix well and serve.

IMPORTANT

- 1) Please make any supplement or diet changes gradually over a one or two week period (too rapid a change may cause loose stools).
- 2) **Springtime** products are whole food based, extremely safe and work best when fed generously.
- 3) When significant portions of **Springtime** products are used, other ingredients should be adjusted to maintain optimal body weight. Lean dogs live longer!

1

Quality dry food

Longevity™ (pg 28) — most powerful single product.

2

Springtime products

Longevity™ (pg 28) and Bug Off Garlic (pg 43) — extremely popular combination.

3

Quality canned food

Longevity™, (pg 28) Bug Off Garlic (pg 43) and Advanced Hip & Joint™ (pg. 20) — complete, all natural program with stunning results.

4

Lukewarm water

Yum!

Springtime

Stress Free Calmplex™

A safe and all natural supplement to help dogs manage stress.

There is a big difference between exuberant, high energy and stressed-out nervousness. **Stress Free Calmplex™** can turn negative, unpleasant situations into joyful, happy ones. Works best when given daily, but can be double dosed to target events.

PRODUCT HIGHLIGHTS

- ▶ Focus and concentration
- ▶ Excellent for showing and performing
- ▶ Improved ability to deal with stress – does not sedate
- ▶ Use with high-strung, nervous, difficult types
- ▶ Prep for troublesome events – vet visits, trips, boarding, etc.

Reo is ready for anything.

"...incredible how he has changed."

Dear Springtime:

Just a quick note to say thank you. I have a "herder with attitude" dog, a Border Collie and Akita cross named Reo. I have had him on **Stress Free Calmplex** for most of this year, and it is incredible how he has changed. Yes, he's still very active, but he has now lost his tendency to be aggressive. As he was a rescue dog, this is good going for him. I hope he will make an agility dog one day, but at the moment, we just keep plugging away to get good behavior out of him.

Maxine Mobbs, Ohio

Bee Pollen™ for Dogs

The ultimate live food!

Bee Pollen™ was our first medicinal food product, and after 30 years, it is still the single most powerful rejuvenator we have experienced:

- ▶ Pollen (male germ cell of plants) builds muscle and improves condition with natural plant sterols and growth factors*
- ▶ Helps keep blood count healthy*
- ▶ Contains powerful, whole food antioxidants, vitamins, minerals and hormones potentiated by massive amounts of live enzyme activity
- ▶ Each batch of our top grade bee pollen is hand picked for freshness and flavor

BEE POLLEN™

SIZE	SCOOPS	COST PER SCOOP	COST PER LB.	TOTAL
★ 3 lb.	192	23¢	\$15.00	\$45.00
12 lb. (4 x 3 lb. jars)	768	16¢	\$10.00	\$120.00

★ Available as a free bonus. See page 49.

DIRECTIONS:

Good: One scoop (≈ 7g) per 40 lb. body weight daily.

Better: Two scoops per 40 lb.

Best: Three scoops per 40 lb.

Best dose is recommended for older dogs/dogs with infirmities or for performance, breeding or high stress situations.

Recommended: For best results, start out with just a sprinkle for the first few days and increase gradually. If stored at room temperature, best used within 6 months after opening. [For longer storage, please refrigerate.]

"...all of our Dachshunds seemed perkier..."

Dear Springtime:

I adopted Lulu when she was 10 years old, and I believe that the extra weight she carried (40 lbs.) before she went into rescue and her age caused most of her joint problems. After about a week on **Springtime Bee Pollen** we noticed all of our Dachshunds seemed perkier, but it was Lulu who exhibited the most energy. My husband asked what had gotten into Lulu, and I told him that I had started her on **Springtime Bee Pollen**. He laughed and said she acted like a bee had stung her the way she was moving so fast!

Madelyn Tallman, Arizona

Madelyn & her dog Lulu are both getting great results from **Springtime Bee Pollen**.

Omega 3-6-9™

Full-spectrum essential fatty acids for a shiny coat and healthy skin.

Many years of study and experimentation determined our choice of product to provide the safest, most reliable source of essential fatty acids. Because omega rich oils tend to oxidize (turn rancid) quickly, we really like the softgel protection from oxygen. If you cut an **Omega 3-6-9™** softgel open and sniff, it will always have a nice fresh aroma.

PRODUCT HIGHLIGHTS

- ▶ For a brilliant, shiny, weatherproof coat and healthy skin
- ▶ Provides complete full-spectrum omega 3-6-9
- ▶ Distilled wild fish oil has been purified to ensure no heavy metals, PCBs, etc.—absolutely clean and safe
- ▶ Provides an additional dietary source of natural anti-inflammatory nutrients*
- ▶ Enhance hip and joint mobility*

OMEGA 3-6-9™

#/JAR	\$/SOFTGEL	TOTAL
200	18¢	\$36.00
400	16¢	\$64.00
800	14¢	\$108.00

GUARANTEED PRODUCT ANALYSIS (per softgel)

Borage seed oil.....	400 mg
Omega-6 Linoleic acid (LA) 35%–42%	
Omega-6 Gamma linolenic acid (GLA) 19%	
Omega-9 Oleic acid 14%–20%	
Distilled wild fish oil.....	400 mg
Omega-3 Eicosapentaenoic acid (EPA) 26.5%–30%	
Omega-3 Docosahexaenoic acid (DHA) 17%–20%	
Organic flaxseed oil.....	400 mg
Omega-3 Alpha linolenic acid (ALA) 45%–65%	
Omega-6 Linoleic acid (LA) 11%–24%	
Omega-9 Oleic acid 11%–24%	
Vitamin E (as dl-alpha tocopheryl acetate).....	5 IU

Ingredients: borage seed oil, distilled wild fish oil (anchovy, mackerel, sardine), organic flaxseed oil, vitamin E, gelatin, vegetable glycerin, mixed natural tocopherols, and purified water.

DIRECTIONS: Just toss them into the regular feed ration. Smaller dogs may prefer contents of softgel to be released from softgel (softgel may be cut open).

Daily dose may be doubled if faster, more dramatic benefits are desired.

Jun^o

Paw-Protector

Dear Springtime:

I just wanted to say that the new product **Skin & Coat** is amazing. We've been using your product during this extreme winter. I checked Juno's feet, and her pads are so soft — not dry or cracked with all this snow and ice. I've been a loyal customer for years. Thanks!

Edward Flynn, New York

GUARANTEED ANALYSIS

Super Seven ≈ 4,500 mg per tsp. oil blend

Ingredients: rice bran oil (minimally processed), coconut oil (organic), extra virgin olive oil (organic), pumpkin seed oil (organic), sesame seed oil (organic), sunflower seed oil (high oleic, organic), walnut oil (cold pressed, organic).

DIRECTIONS: Simply top dress on food once or twice daily.

Dogs: Give ½ to 1 full tsp. per 40 lb. [16 oz. ≈ 96 tsp.; 32 oz. ≈ 192 tsp.]

Cats: Give ¼ tsp. per 10 lb. [16 oz. ≈ 384 ¼ tsp.; 32 oz. ≈ 768 ¼ tsp.]

* This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Meet the Super Seven

New **Skin & Coat Oil** is made with seven minimally processed top-grade seed oils. Its **natural amber/brown color** comes from valuable nutrients normally lost in the refinement process of oils for cooking.

Skin & Coat Oil is a nutritional oil rather than a cooking oil. Its full-spectrum antioxidants keep it fresh and safe – no refrigeration necessary. Those same nutrients protect pets' cellular health and contribute to disease resistance and long life. **Its naturally mild taste and aroma are readily accepted by cats and dogs.**

Rice Bran Oil

Minimally processed
Extra high oryzanol

Grown and processed in South America (in a non-GMO region), **rice bran oil** is universally recognized as the world's healthiest food oil. The grade used by Springtime is, by far, the best for nutrition. It contains super-rich amounts of phytonutrient antioxidants like oryzanols, tocopherols, tocotrienols, phytosterols, vitamin E and an array of other health-promoting nutrients. Its naturally occurring gamma oryzanol can also improve muscle tone.

Coconut Oil

Organic

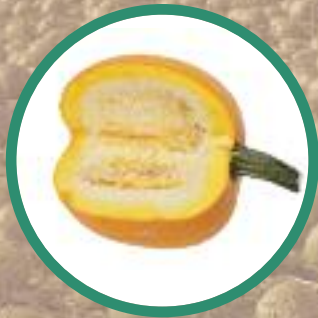

Contains medium chain fatty acids which are antibacterial, antifungal, and antiviral. Improves digestion, reduces allergic response, and speeds healing.

Extra Virgin Olive Oil

Organic

Contains phenolic compounds that act as antioxidants and have anti-inflammatory, antimicrobial and antiviral properties.

Pumpkin Seed Oil

Organic

Rich source of phytoestrogens can improve plasma lipid profile and act as a general tonic.

Sesame Seed Oil

Organic

Highest phytosterol content of the most commonly consumed seeds in the United States. Markedly slowed aging in laboratory mice.

Sunflower Seed Oil

High oleic, organic

Excellent source of mono-unsaturated fatty acids (MUFAs). Helps absorption of fat-soluble vitamins.

Walnut Oil

Cold-pressed, organic

Source of ALA (omega 3) converted to EPA and DHA in the body. Shown to reduce age related degeneration.

Bug Off Garlic Chewables for Dogs

A safe and effective all natural bug repellent.

GUARANTEED ANALYSIS (per tablet)

Garlic granules	1,000 mg
Desiccated raw beef liver	350 mg
Nutritional yeast culture	350 mg

Ingredients: air-dried garlic granules, desiccated beef liver, nutritional yeast culture, dextrose, microcrystalline cellulose, and stearic acid.

REAL BEEF LIVER

Springtime uses beef liver in generous quantities to make our dog products easy to feed. The beef liver is from hormone-free cattle raised in pristine wild areas of Argentina. The beef liver is also loaded with essential vitamins and minerals dogs need.

DIRECTIONS: Just toss them into the regular feed ration. Tablets may be broken into pieces for small or sensitive dogs. Please introduce gradually (over 5-10 days). It may take 2-4 weeks to maximize protection. Year-round feeding is recommended.

DOG SIZE	WEIGHT	DAILY DOSE
Toy	under 20 lb.	¼-1
Small	20-40 lb.	1-2
Medium	40-80 lb.	2-4
Large	80-120 lb.	4-6

Bug Off Garlic for Dogs

Real Letters from Real People

No more harsh chemical flea and tick treatments!

Dear Springtime:

Our family has been using **Springtime** products for over 20 years, and we keep coming back for more. We swear by the **Bug Off Garlic Chewables**. They have allowed us to completely move away from harsh chemical flea and tick

“So many people have been brainwashed into thinking they need to treat their dogs with chemicals to have success, and it’s simply not true.”

Adler, Bean & Max haven't had a flea or tick issue.

treatments. We have five dogs in our home, and we haven't had a flea or tick issue. I think my son and I are the only ones who have had a tick on us! Perhaps we should take **Bug Off Garlic**, too! We keep trying to get our family and friends to

give the pills a try. So many people have been brainwashed into thinking they need to treat their dogs with chemicals to have success, and it's simply not true.

Amber Verbeke, Kansas

Bug Off Garlic Beats the Competition During Hike

Dear Springtime:

I recently took my dog, Wally, and my father's two dogs (a Lab and a Yorkie) out for a hike in the woods. Wally gets 6 chewable tablets of **Bug Off Garlic** a day. The Lab is on Frontline Plus and wears a Scalibor flea & tick collar, and the Yorkie only gets Frontline Plus treatments. Guess which dog had absolutely no ticks when we got home? That's right — Wally was completely tick-free, while both of my dad's dogs had numerous ticks on them. Thanks again for such a great product!

Sincerely,

Jessie Green, Maine

Wally was completely tick-free!

Wonderful for dogs — and goats!

Tricia with
Lucy (left) &
Molly (right)

Dear Springtime:

I just wanted to tell you about my wonderful experience with **Bug Off Garlic**. I have been using it for my dog and my goats since March. I was a little concerned about using it for the goats because we drink the milk. I thought it would have a garlicky taste. Well, to my surprise it does not have the least little bit of garlic flavor!

I haven't had any problems with flies biting them. The numbers in the barn have been drastically reduced to the point that I thought they actually hadn't really arrived yet until I talked to a friend who said otherwise. I usually also have mosquitoes because we have a lot of woods, and they are constantly landing on my goats and biting. Not this year!

Thank you for an amazing product!

Tricia Hoover, Pennsylvania

Amazing results in a bug-infested area...

Claudia is amazed how well **Bug Off Garlic** is working for her Border Collies: Tommie, Catcher & Levi.

Dear Springtime:

I'm amazed. I have had two of my dogs on your product **Bug Off Garlic** granules and now just started a young dog on it, all Border Collies. No fleas and only an occasional tick! No side effects either. I'm in bug-infested Florida.

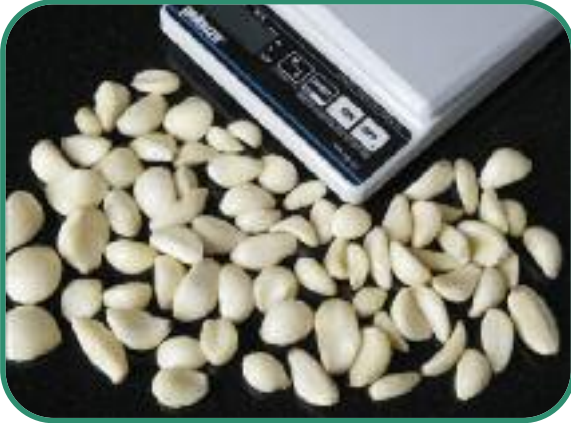

Thanks!

Claudia Van Gee, Florida

Garlic Is Proven Safe for Dogs

A Japanese study* proves that garlic toxicity is almost impossible to reach.

The Study

The actual amount of garlic fed daily to dogs in the study.

Dose: 1/2 lb. (equal to about 78 cloves) per 100 lbs. body weight is the amount force-fed to study dogs each day for seven straight days. (3 1/2 lbs. total equal to 546 raw cloves per 100 lbs. bodyweight)

Result: Microscopic examination of subject dogs' blood showed oxidative damage to a small percentage of red blood cells. No dog was anemic. No dog was reported to show sickness, weakness, or other negative signs. Researchers guessed that continued feeding would eventually cause anemia. ♦

* Lee, K.W., Yamato, O., Tajima, M., Kuraoka, M., Omae, S., Meade, Y. "Hematologic changes associated with the appearance of eccentrocytes after intragastric administration of garlic extracts to dogs." *American Journal of Veterinary Research*. November 2000. Vol. 61, No. 11, 1446-1450.

NOTE: Springtime, Inc. is not affiliated in any way with the researchers or publishers of this study.

Conclusion: Safe

Dennis Hampt, Owner/President of Springtime since 1979.

In my opinion, it is extremely unlikely that any dog would ever voluntarily eat the amount of raw garlic necessary to reach the minimum toxic dose. Most natural veterinarians who recommend feeding raw garlic stay well under 10% of that amount.

Bug Off Garlic air-dried granules are virtually impossible to overfeed. Raw garlic contains about eight times the amount of allicin (oxidative compound)** found in air-dried garlic powder. Increasing the dose eight times means you'd have to feed more than 4 lbs. of **Bug Off Garlic** per 100 lbs. of body weight per day. Normal usage is less than 1% of that amount. **Bug Off Garlic** is absolutely safe for everyday, year round use. ♦

Dennis Hampt

** Pearson, Wendy. "Garlic (*Allium Sativum*) for Horses: *In Vitro* Antibacterial Activity and *In Vivo* Toxicity." Professor M.I. Lindinger. University of Guelph, 2003.

Toxicity Can Be Confusing

From water to snake venom, the toxicity depends on the dosage.

The toxicity of any substance is dose-dependent. Water is healthy, but drinking excessive amounts of water can lead to fatal hyponatremia (a.k.a. water intoxication). Just like water, **garlic is perfectly safe** under ordinary usage.

Garlic and Long-Term Health

Five Reasons Why Garlic is Good For Dogs

In her book, *The Healthy Pet Manual – A Guide to the Prevention and Treatment of Cancer*, Deborah Straw explains why garlic is recommended for dogs:

- 1) Garlic has been given to both humans and animals medicinally for more than 4,000 years.
- 2) A study conducted by the National Cancer Institute found garlic to be an effective inhibitor in the growth of cancer cells.
- 3) Garlic can help rebuild the immune system and is a good remedy for the prevention of fleas.
- 4) Selenium, a component of garlic, acts as an antioxidant and activates enzymes which may protect against cancer.
- 5) Veterinary surgeon Buster Loyd-Jones achieved “spectacular” results by giving garlic to dogs.

For more information or to purchase a copy of the book please visit www.innertraditions.com.

Tips for a Happy & Healthy Pet

- Feed your pet a balanced natural diet.
- Take control of home and lawn chemicals your pet may be exposed to.
- Lower your stress (it will help lower your pet's stress, too).
- Spend more time with your pet, as they need our love and care.
- Feed **Bug Off Garlic** and **Longevity™** daily to detoxify and protect your pet.

Spirulina: A Miracle Food with Live Factors

Spirulina is an edible blue green micro-algae that assists multiple metabolic functions in the body.

Spirulina is a microscopic blue-green vegetable algae that nourishes the endocrine, nervous and immune systems, and can promote tissue repair and reduce inflammation. Spirulina is a source of highly absorbable protein, mixed carotenoids and other phytonutrients, B-Vitamins, GLA and essential amino acids. Of all the algae, Spirulina has emerged as an especially potent and healthy food source for humans and animals alike.*

The concentrated nutritional profile of Spirulina occurs naturally and, because it is a whole food, it is safe to eat, even in large quantities. In fact, Spirulina is one of the most concentrated and nutritious whole foods known to man. Spirulina has been used as a significant food source for centuries. Modern culture systems are strictly controlled, assuring 100% purity of the strain for a safe and reliable supply. ♦

PER 10 SPIRULINA WAFERS (2,000 mg each)

Protein	12.1 g
Vitamin A (100% Beta Carotene).....	67,000 IU

A Scientific Overview of Chondroitin Sulfate

Chondroitin sulfate provides powerful natural support for joints and skin.

Chondroitin sulfate (CS) is a naturally occurring molecule found in the cartilage and connective tissues of people and animals. Chondroitin is the substance that enables cartilage to provide cushion to healthy joints, and it's what the body uses to make new cartilage. Chondroitin also serves a vital role in the maintenance of healthy skin/coat. Chondroitin can be taken as a supplement for cartilage maintenance, joint lubrication, healthy skin/coat, and as an anti-inflammatory. It is an effective treatment for arthritis, particularly osteoarthritis (OA).*

Chondroitin enables cartilage to provide cushion to healthy joints, and it is what the body uses to make new cartilage.

Not all chondroitin is created equal

The chondroitin used in dietary supplements is extracted from the cartilage and connective tissues of animals. The most common animal sources are cow, pig, chicken, and shark. Chondroitin varies depending on the source, and scientists have separated it into three distinct classes: A, B, and C. This is important because chondroitin-A has greater health benefits than B or C, and some animal sources have more chondroitin-A than others. For instance, beef trachea cartilage (used by Springtime) has among the highest concentrations of chondroitin-A. Conversely, some products on the market are labeled as 100% chondroitin but contain little to no chondroitin-A, rendering them woefully ineffective.

The science of chondroitin

Chondroitin sulfate is one of six related substances called glycosaminoglycans (GAGs), which are also referred to as mucopolysaccharides. Adequate amounts of chondroitin are vital for normal joint function and maintenance as well as many other self-healing mechanisms. The following list of activities have been proven in numerous scientific studies:

- 1 Osteogenesis:** chondroitin-A is an important participant in bone calcification and chondroitin-C in bone integrity maintenance. (Serni, 1991; Vacha, 1994).
- 2 Analgesic and restorative effect:** A very important property of chondroitin sulfate is its ability to stimulate the chondrocyte (cell that synthesizes the proteoglycans in the articular cartilage), which is conducive to the proper maintenance of the cartilage matrix. (Serni, 1991; Vacha, 1994).
- 3 Enzymatic inhibition:** The capacity of chondroitin sulfate to inhibit the action of destructive enzymes of the articular cartilage protects joints and helps maintain harmonic balance of healthy enzyme activity. This in turn helps avoid degradation of hyaluronic acid, a necessary molecule for the maintenance of hydration and viscosity of synovial fluid. (Avila, 1976; Marossy, 1981; Pipitone, 1991; Videla Dorna et al., 1994).
- 4 Anti-inflammatory effect.** (Paroli, 1991; Pipitone, 1991; Rashmir-Raven, 1992).

Springtime

Bug Off Garlic Granules for Horses

A safe and effective all natural bug repellent.

**BUY TWO
GET ONE FREE
SAVE 33%**

Veterinarians versed in natural alternatives use garlic in their private practices throughout the world. Although best known for its health protective properties, garlic has been used for centuries as an insect repellent. **Springtime's** air-dried garlic takes that benefit to a new level and is far safer than many chemical products. You may use this product with total confidence.

PRODUCT HIGHLIGHTS

- ▶ Provides a 24-hour shield against flies, ticks, mosquitoes, gnats, etc.*
- ▶ No "spray on" hassles
- ▶ Safe, effective alternative to chemical products
- ▶ Stimulates immunity – antibacterial, antifungal, antiviral, & anti-parasitic*
- ▶ Promotes friendly bacteria in the digestive tract

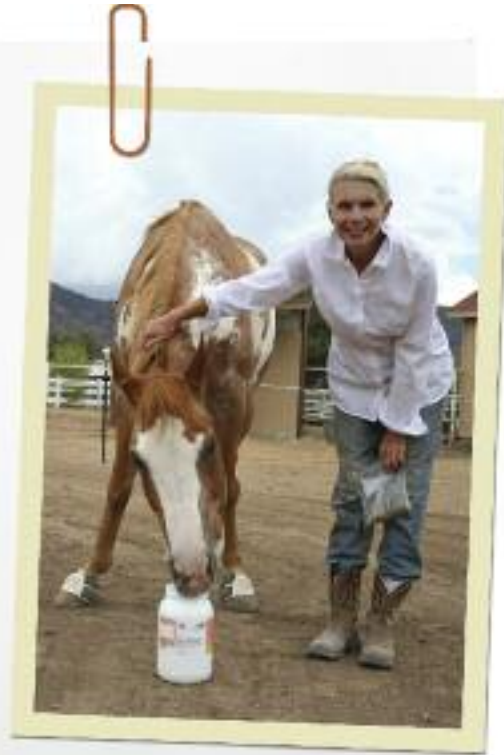

"...a complete surprise!"

Dear Springtime:

I use your Springtime **Bug Off Garlic** for horses and have seen wonderful results. I look across the street and the neighbors' horses are swatting flies constantly. There are no flies on my horses. Something I noticed that might help promote your product even more is there are no flies on the horse manure in my paddocks or stalls. That was a complete surprise!

Mary Merchant, Arizona

★ Available as a free bonus. See page 49.

DIRECTIONS: Just add into regular feed ration.

Good: One scoop (≈ ¾ oz.) per 1,000 lb. body weight daily.

Better: Two scoops per 1,000 lb.

Best: Three scoops per 1,000 lb.

Best dose is recommended for areas of high infestation.

Recommended: Please start out with just a sprinkle for the first few days and increase gradually to the best amount for your horse's weight. It may take 2-4 weeks to maximize protection. Year-round feeding is recommended. For picky eaters, please sprinkle garlic around feeding area before introducing **Bug Off Garlic** to feed.

Bug Off Garlic for Horses

Real Letters from Real People

“...I will never switch again!”

Robyn & Pepper

Dear Springtime:

I just wanted to let you all know that I absolutely love the **Bug Off Garlic** for horses. This is the second time I have used it and, man, what a difference! Last year, I tried a different bug product, and it didn't do a thing. So I switched back to your product, and I will never switch again!

“...everyone else was having to cover their horses with fly spray, and I didn't have to use any.”

Just today I went for a beautiful day ride up at Mt. Adams, Washington, and everyone else was having to cover their horses with fly spray, and I didn't have to use any. My horse didn't even swish his tail at all on the entire ride. Super product.

Robyn Perdue, Oregon

Parasite Control!!!

Dear Springtime:

To save money in my budget one year, I didn't order the **Bug Off Garlic**. I noticed quite an increase in bot eggs on the horses' coats.

“I like seeing remarkable improvements in the horses' coats...”

Immediately I ordered a supply of the **Bug Off Garlic** and used the product since. My horses are extremely important to me. I like seeing remarkable improvements in the horses' coats, parasite

K.S.W.'s horses have beautiful coats.

control, and a few to no visible bot eggs. I want to thank you, Springtime, for your dedication to producing quality products!

K.S.W., New York

No Spray for Newborn Foal!

Dear Springtime:

Since I live in Florida, bugs are a very big problem, and flies can carry diseases. So I was a nervous wreck when my first foal, Mugz, was born. Of course, I didn't want to have to spray my newborn foal with fly spray, but I didn't want him to get eaten up either. I have always started feeding my horses **Bug Off Garlic** in March to prepare for the high bug seasons, and I noticed when Mugz was born, there were no flies on him.

When the vet got there, he kinda scolded me because he thought I had sprayed Mugz with fly spray. It was only then that I realized that by feeding my mare, Enjoying A Dream, **Bug Off Garlic** while she was pregnant, that it protected her foal when he was born.

Thank you!

Dellrie Humphrey, Florida

Garlic Chemistry Varies: Raw Garlic Cloves Vs. Air-Dried Garlic Granules

Many natural veterinarians choose **Bug Off Garlic** for absolute safety, healthy benefits, and greatest insect repellent properties.

Springtime

Joint Health Formula™ for Horses

Proven formula promotes healthy cartilage, tendons, and ligaments.

Ever since Springtime started to supply joint health products in the early nineties, we have received enormous positive customer feedback concerning their effectiveness. **Joint Health Formula™**, using the popular ingredients MSM, glucosamine HCL, chondroitin sulfate, and boswellia extract, represents a highly evolved effort to present the best product possible. We are confident that you will find this product superior to any other on the market.

PRODUCT HIGHLIGHTS

- ▶ Ingredients are widely accepted by mainstream medical professionals as legitimate, therapeutic and non-toxic*
- ▶ Superior joint lubricants reduce stiffness*
- ▶ Promotes ligament & tendon health*
- ▶ Powerful anti-inflammatory
- ▶ Fastest results—strongest product on the market!*

Dressage Dream Realized!

Dear Springtime:

My dressage horse "Gerri," a 12-year-old Warmblood, was diagnosed with three injuries in his right hind leg: bone bruise in the foot, strained suspensory, and crushed cartilage in the fetlock. I was told that the crushed cartilage would never heal.

I had been struggling to reach Grand Prix dressage for 25 years. Gerri went lame two months before my first show at Grand Prix. It was absolutely devastating, almost unreal.

The vets said to give him six months off. About two months into his rest, I started him on **Joint Health Formula**. I started him back to work after six months. He was completely sound. He hasn't been lame since.

Finally, I realized my dream of qualifying for and competing in the regional finals at Grand Prix. Gerri, and I came in fourth place. I credit **Joint Health Formula** for giving me back my horse.

Thank you, **Springtime**,

Jeffie Pike, Washington

Gerri recovered in time for Grand Prix!

JOINT HEALTH FORMULA™

SIZE	PORTIONS★	COST/PORTION★	TOTAL
2.5 lb.	80	\$1.13	\$90.00
5 lb.	160	93¢	\$149.00
10 lb.	320	86¢	\$275.00
20 lb.	640	78¢	\$499.00

★ Per 1,000 lb. weight

DIRECTIONS: Add to regular feed ration. Dose may be given once daily or halved into a morning and evening feeding (recommended).

Good: ¾ scoop (≈ ½ oz.) per 1,000 lb. body weight daily.

Better: 1 level scoop per 1,000 lb.

Best: 1 heaping scoop per 1,000 lb.

Best dose recommended for older horses, horses under stress, or horses with obvious problems. To begin program, also use best dose (1 heaping scoop) daily for the first week.

Please Note: Safe use of boswellia in pregnant animals or animals intended for breeding has not been proven.

GUARANTEED ANALYSIS (per ½ oz.)

Boswellia serrata extract 65%	3,500 mg
MSM, 99% (methyl sulfonyl methane)	3,500 mg
Carrot powder	2,675 mg
Glucosamine HCL, 99% (shellfish extract)	2,500 mg

Horse Rescue Ranch Relies on Springtime Supplements

Dear Springtime:

I wanted to tell you about a horse named Joey who enjoyed his final 21 months because of your products, especially the **Joint Health Formula**.

My husband and I retired and moved to Texas where we built Forever Home Ranch, which takes in horses that have been seized by law enforcement because of neglect or cruelty. Joey came to us in June at age 23, and he was about to be put down because he was in terrible shape. Three knees were shot from his previous owners using him too long as a cutting horse. He was missing most of his teeth, but no one checked why he couldn't eat. So he was down to skin and bones when he arrived. No one thought he would make it to Christmas.

“When people who ask how we keep the elders in such good shape, we tell them about our success with Joint Health Formula and the other Springtime products.”

We were using **Joint Health Formula** (and **Bee Pollen, Gamma**, and **Bug Off Garlic**) with most of the horses we have, but our vet told us to use triple the amount for Joey.

By October, Joey was trotting. By the next January, we saw him canter several times, and the trotting was a daily event to both breakfast and dinner meals. Joey was doing well. For almost two years — and two Christmases — he enjoyed his time to the fullest.

Joey's body finally betrayed him in April. It is hard for me to think about Joey without getting upset, but I have wanted to write to thank you for having a product that made his last months mostly pain-free.

When Joey was rescued in June, no one thought he would survive until Christmas!

When people who ask how we keep the elders in such good shape, we tell them about our success with **Joint Health Formula** and the other Springtime products. We have only lost four equines in the three years since we moved here, and although their average age is late twenties, most of the others are going strong and are much healthier than when they arrived.

Your phone folks are also informative and helpful, and that is something that is, unfortunately, becoming rare these days. Thank you for the help you have given us over the years.

Peggy Neaves, Texas

John Boy still trots at 40 years old!

Dear Springtime:

My 40-year-old horse, John Boy, started limping really bad and his front legs were breaking down. I decided to try your **Joint Health Formula**. Within three weeks, I started to see he wasn't creeping out of his stall in the morning, he was walking out. Then, at about five weeks, he trotted out a few times. Then, one day, he must've remembered he could lope, and off he went outside. He's sooooo much better now.

Johnny says, "Thanks, **Springtime!**" (Me, too!)

Ann Pendleton, Maine

"Count Snappy," a retired
show jumper.

No More Severe Joint Issues

Dear Springtime:

My horse thrives on your products. His registered name is Snappy Count. We call him Snappy, but at times we refer to him as "Count Snappy" when his Thoroughbred blood leads him to act like royalty

**"...sound at 27 and still
enjoying trail rides..."**

that I am to wait on hand and foot! Actually, he's a very fine old gentleman. He would not be sound at 27 and still enjoying trail rides if it were not for **Joint Health Formula**. He's a retired show jumper that has severe joint issues, but you would never know it.

Michelle Eppinga, North Carolina

BOSWELLIA SERRATA

TRADITIONAL USE

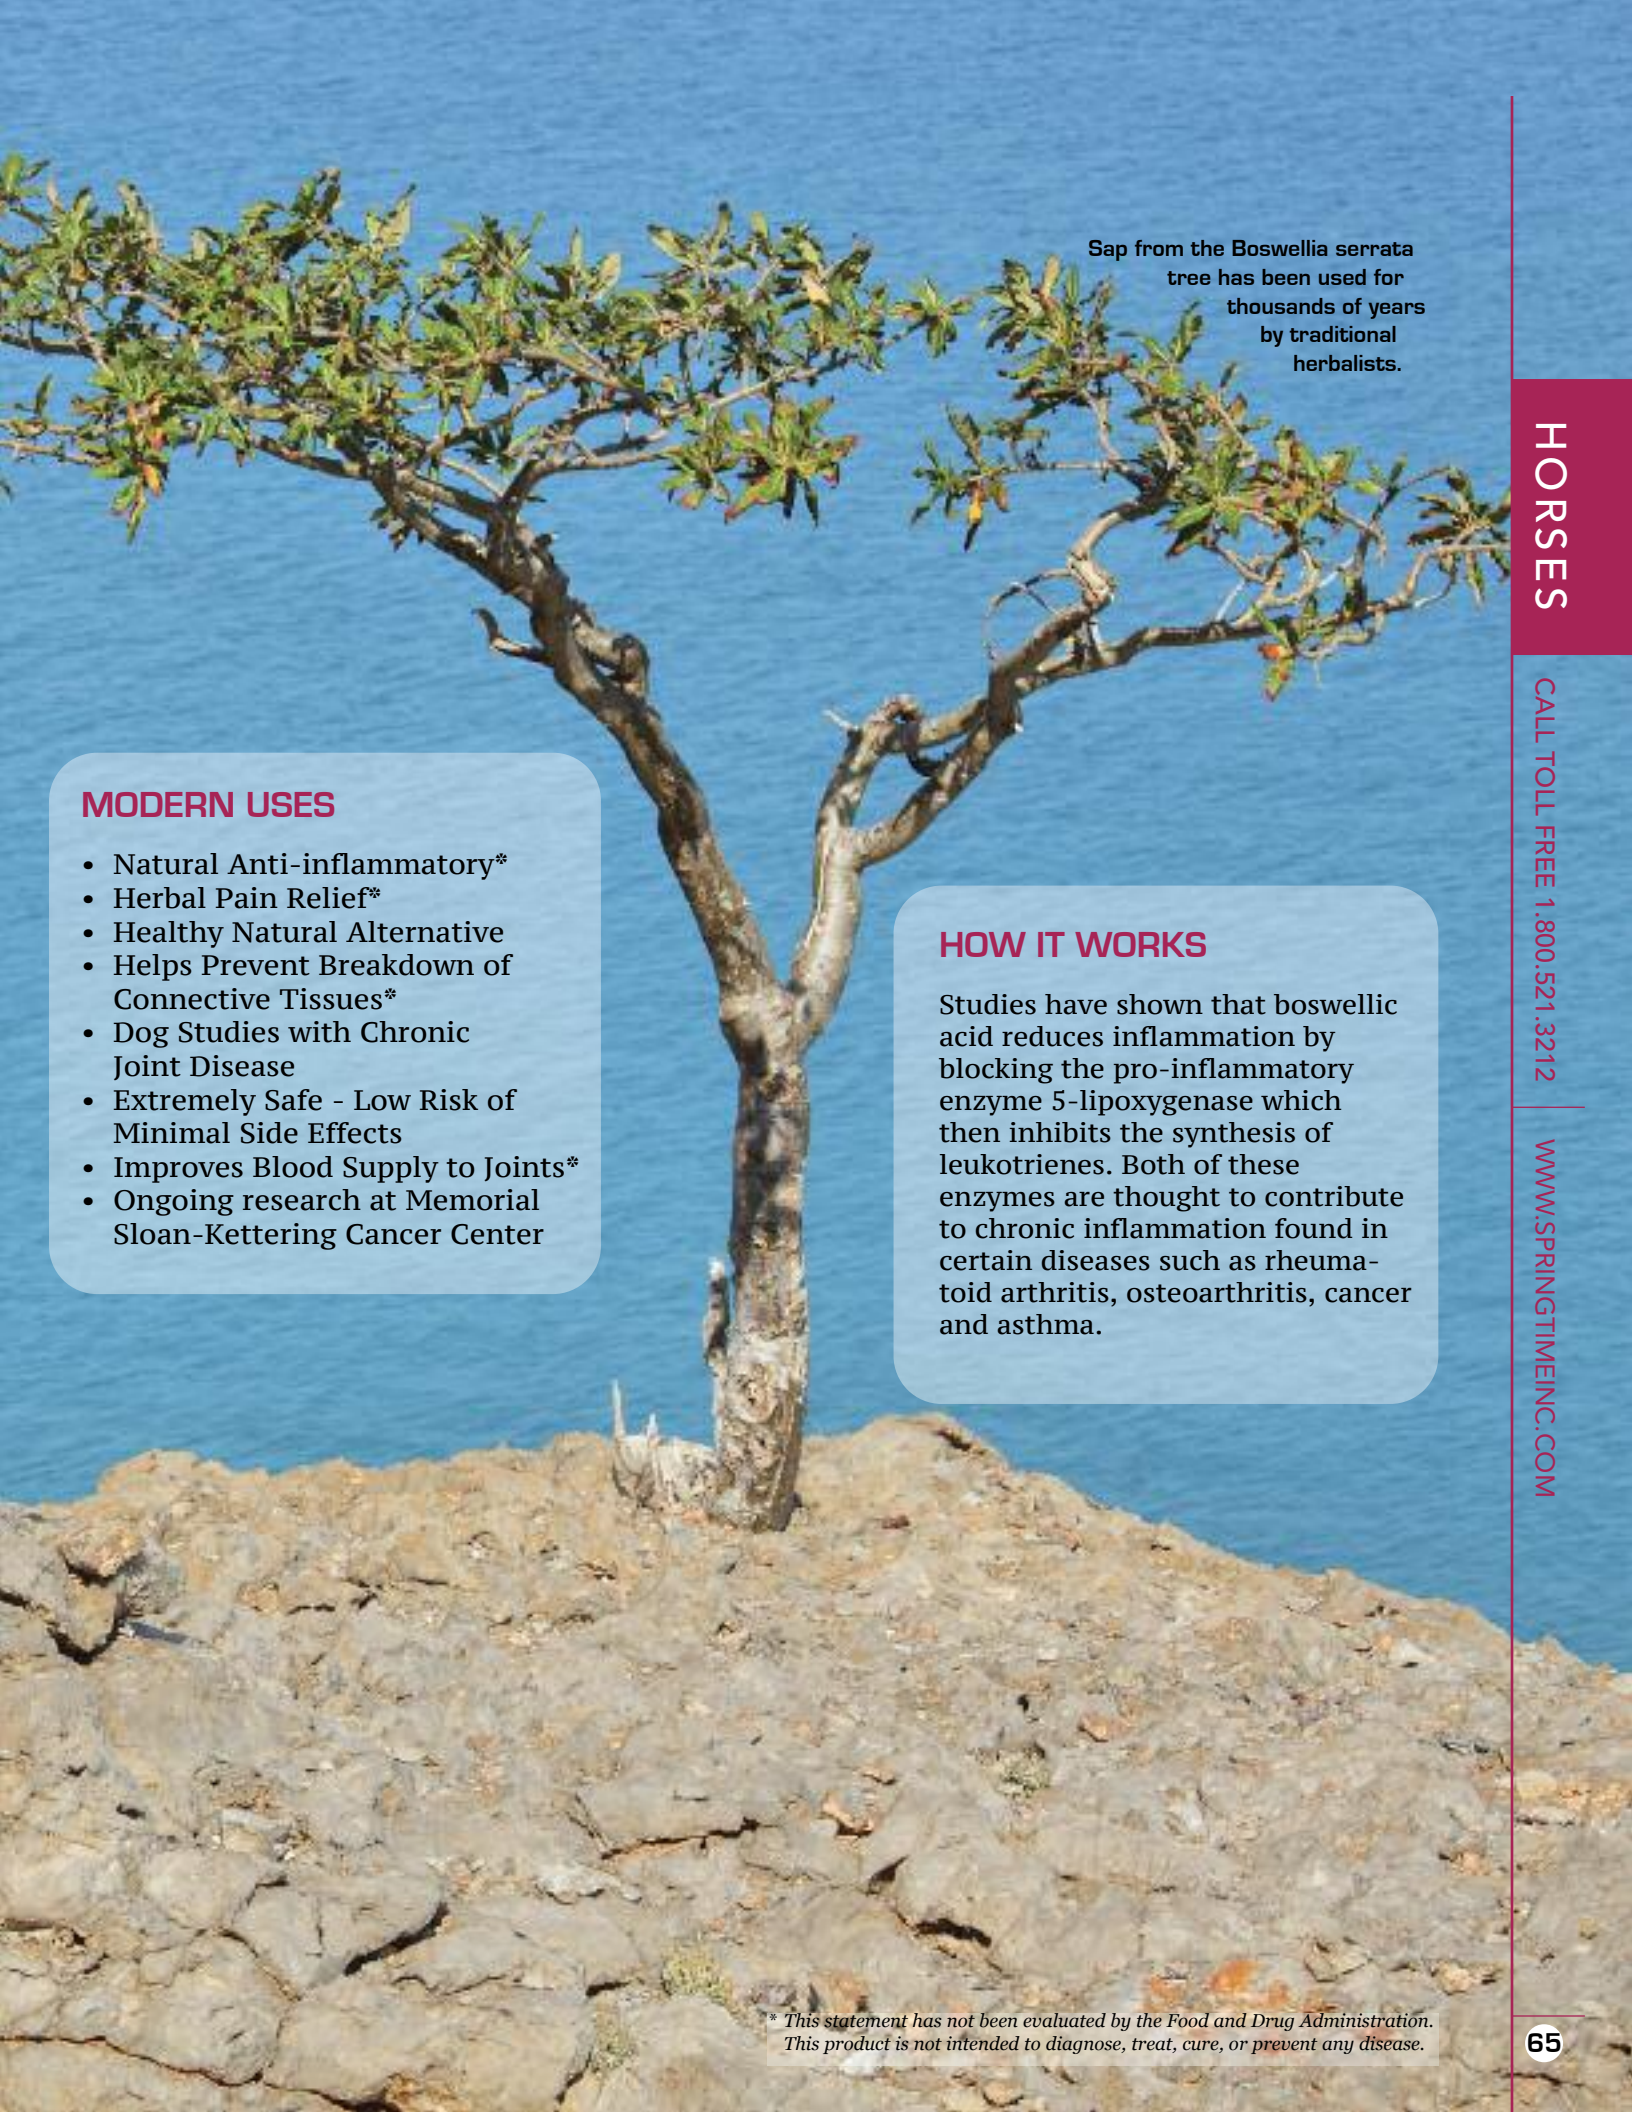

The gum resin of the *Boswellia serrata* tree has been used medicinally for centuries. Traditional healers used the *Boswellia* resin to treat arthritis, colitis, sores, coughs, asthma, and even snakebites!

DOG STUDY

“Dietary support with *Boswellia* resin in canine inflammatory joint and spinal disease.”

In Switzerland in 2004, a veterinary clinical trial was conducted comparing conditions of dogs with osteoarthritis and degenerative conditions before and after treatment with an extract of *Boswellia serrata*. The extract was given once a day with food at 400 mg/10 kg of body weight for six weeks. After just two weeks, researchers noted that 71% of the dogs showed improvement. By week six, significant positive changes were shown in increased smoothness of gait, and reduction of lameness and pain. A few dogs had brief, reversible episodes of loose stools. Data suggested that a standardized extract of *Boswellia serrata* could be recommended for symptom relief in dogs with osteoarthritic disease.

Reichling J, Schmokel H, Fitzi J, Bucher S, Saller R. Web. 5 December 2010, PMID: 14994484.

Sap from the *Boswellia serrata* tree has been used for thousands of years by traditional herbalists.

MODERN USES

- Natural Anti-inflammatory*
- Herbal Pain Relief*
- Healthy Natural Alternative
- Helps Prevent Breakdown of Connective Tissues*
- Dog Studies with Chronic Joint Disease
- Extremely Safe - Low Risk of Minimal Side Effects
- Improves Blood Supply to Joints*
- Ongoing research at Memorial Sloan-Kettering Cancer Center

HOW IT WORKS

Studies have shown that boswellic acid reduces inflammation by blocking the pro-inflammatory enzyme 5-lipoxygenase which then inhibits the synthesis of leukotrienes. Both of these enzymes are thought to contribute to chronic inflammation found in certain diseases such as rheumatoid arthritis, osteoarthritis, cancer and asthma.

J-Flex Concentrate™ for Horses

The finest chondroitin sulfate promotes joint and cartilage health.

J-Flex Concentrate™ has been on the market for over 22 years and still packs more punch per dollar spent than any competitor. The secret is the superior purity and bioavailability of our chondroitin sulfate extract. We have used the highest grade quality from the beginning and would not dream of changing. This product is a proven winner.

PRODUCT HIGHLIGHTS

- ▶ Promotes cartilage & joint health*
- ▶ Most cost effective joint product on market
- ▶ A 50-to-1 concentrated extract, as opposed to dried cartilage powder often sold as chondroitin
- ▶ Minimum 90% pure (United States Pharmacopeial specifications)
- ▶ Virtually tasteless & odorless

SPRINGTIME, INC.

"He moves like a horse half his age."

Dear Springtime:

I just wanted to thank you for giving my wonderful 16-year-old Tennessee walking horse gelding (aka Big Boy) his life back. Just as show season was about to get under way this year, he was spooked in his paddock in the middle of the night and re-injured an old injury to his right front pastern. After being on another supplement and no riding for about six weeks, I couldn't see much improvement.

A friend told me about **J-Flex Concentrate**. Nothing else had worked, so I figured I might as well give it a try. Am I glad I did! After just a week of being on **J-Flex Concentrate**, Big Boy is like a new horse. He moves like a horse half his age. I now look forward to many more years of showing this wonderful and incredibly beautiful animal — and it's all thanks to **J-Flex Concentrate**.

Sincerely,

Pat Ireland, North Carolina

GUARANTEED ANALYSIS (per lb.)

Chondroitin sulfate, purity min. 90% 453,600 mg
(bovine cartilage extract)

Ingredients: chondroitin sulfate.

DIRECTIONS: Add to regular feed ration.

Good: ½ scoop (≈ 2,000 mg) per 1,000 lb. body weight daily.

Better: 1 scoop (≈ 4,000 mg) per 1,000 lb.

Best: 2 scoops (≈ 8,000 mg) per 1,000 lb.

Best dose recommended for faster, more dramatic results. To begin program, use best dose [2 scoops] daily for the first week.

Feeding hint: Mix in a handful of sweet feed.

* This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Springtime

Gamma™

Gamma oryzanol produces lean muscle mass and a shiny coat.

Gamma oryzanol is a rather rare nutrient that occurs in rice bran.

After being extracted and purified, **Springtime** blends it into rice bran oil, which is one of the world's healthiest edible oils which contains vitamins, antioxidants, and other nutrients. While gamma oryzanol helps build muscle, rice bran oil will bring out a deep, glowing shine in your horse's coat.

PRODUCT HIGHLIGHTS

- ▶ Strengthens the musculature of the body while burning fat*
- ▶ Preps young horses for sale or training
- ▶ Helps underweight horses muscle-out*
- ▶ Produces a beautiful, lean, muscle mass*
- ▶ Safe, legal, natural

"The difference in her haircoat and muscling is amazing."

Dear Springtime:

I've enclosed photos of SC Splash's Valley Girl, alias Magic, taken when I bought her in January, and later in June. She has been on **Springtime Gamma**. The difference in her haircoat and muscling is amazing. I've used **Gamma** before on a mare I showed in halter with the same great results.

Thanks for a great product!

Sincerely,

Laurie Truskauskus-Knott, Texas

Gamma oryzanol 100,000 mg

Ingredients: rice bran oil, gamma oryzanol (purified at 97%).

DIRECTIONS:

Daily: The average effective serving size varies from horse to horse, according to age, weight, and severity of problems. Give one squirt (1 oz.) per day per 1,000 lb. horse. Faster, more dramatic results will occur with larger servings.

Pre-Event: One squirt (1 oz.) the evening before and the morning of.

Springtime

Daily Calm™

Top grade ginseng helps reduce stress without sedation.

**BUY TWO
GET ONE FREE
SAVE 33%**

Top grade panax ginseng extract is the primary active ingredient in **Daily Calm™**. Ginseng is the best known and most widely used of botanicals referred to as adaptogens, harmony remedies, or longevity tonics. They combat stress, improve health and well-being, and upgrade athletic performance. The other ingredients in **Daily Calm™** help prevent adrenal exhaustion and assist free radical scavenging. Not only will **Daily Calm™** assist nervous horses, it is useful for any high performance lifestyle.

PRODUCT HIGHLIGHTS

- ▶ Improves resistance to stress*
- ▶ Does not sedate
- ▶ Reserves energy for periods of peak requirement*
- ▶ Stallwalkers, weavers, easily "spooked," high-strung types
- ▶ Enhances focus & attention during lessons*

"...we have successfully saved a beautiful horse..."

Dear Springtime:

I run a horse boarding stable in Florida. I took in a new boarder — a 7 year old, 14-hand Paint mare, Kaylee. The horse had never been ridden, could not even be led very well, and was nervous and jumpy. Her owner had just rescued her from a very bad situation, and she wanted our help here at the stables. Right away we could tell this horse had many problems to deal with. So, for the sake of the lady (who needed a quiet horse) and the horse, I bought the mare.

I put her on **Daily Calm** twice a day with lots of groundwork. It has now been four years that I have owned her. She will always have her nervous nature, but with **Daily Calm** and good training and care, we have successfully saved a beautiful horse and gave her a job. We trail ride together and use her to ride when I give the public rides. Thanks **Springtime**, for such a good product.

Sincerely,

Elizabeth Nobles, Florida

Kaylee with her owner Elizabeth

Spirulina Wafers™ for Horses & Dogs

A powerful all natural blood builder, detoxifier, and allergy-relief supplement.

**BUY TWO
GET ONE FREE
SAVE 33%**

Spirulina is a microscopic blue-green vegetable algae that nourishes the endocrine, nervous and immune systems. It is a deceptively simple food containing complex and powerful live food enzyme systems and an enormous spectrum of other nutrients. By assisting multiple metabolic functions, it will produce and maintain a brilliant natural bloom. Ideal for performance, breeding, or high stress situations.

PRODUCT HIGHLIGHTS

- ▶ Effective for seasonal allergies and breathing problems*
- ▶ Liver and kidney tonic with protective detoxicant and restorative properties*
- ▶ Powerful immune stimulant with anti-infective, antiviral, and antibiotic properties*
- ▶ Nerve tonic – relieves anxiety and promotes a calm, upbeat demeanor*
- ▶ Promotes tissue repair and reduces inflammation*

Dear Springtime:

Your **Spirulina Wafers** worked wonders on my Oldenburg, Zach. His allergies made it impossible to ride him, with the snorting and flinging of his head due to his runny nose. Within a week of taking **Spirulina Wafers**, his allergic reactions stopped, so I kept him on it until the time when his allergens stop (around mid-July).

Thanks for your help!

Karen Sanz, Wyoming

GUARANTEED ANALYSIS (per wafer)

Raw Spirulina 2,000 mg

Ingredients: raw spirulina, dextrose, and stearic acid.

DIRECTIONS: Give at least one wafer (2,000 mg of Spirulina) per 100 lb. body weight daily (for example: give 10 wafers or more for a 1,000 lb. horse). For best results, start out with just a few wafers for the first few days and increase gradually to full dosage. Dosage may be doubled or tripled for performance, breeding or high stress situations.

GREAT FOR DOGS: Give dogs ½ wafer to 2 full wafers per 40 lb. of body weight daily.

Springtime Spirulina Wafers™ make feeding convenient and easy. We don't offer spirulina powder because its texture is extremely light and fluffy and blows everywhere in the wind.

Springtime

Bee Pollen™ for Horses

Our top grade bee pollen granules are loaded with nutritional benefits.

Bee-collected flower pollen was the first medicinal food marketed by Springtime back in 1979. Not only is it our oldest product, but the one we still respect the most. We sell top grade, whole granules. Each batch is hand picked for freshness and flavor. We are very serious about this product. After 30 years, it is still the single most powerful rejuvenator we have experienced.

PRODUCT HIGHLIGHTS

- ▶ Can help solve ulcers caused by lack of grazing*
- ▶ Pollen (male germ cell of plants) builds muscle and improves condition with natural plant sterols and growth factors*
- ▶ Helps keep blood count healthy*
- ▶ Natural food of stallions, mares and foals
- ▶ Totally safe & beneficial for performance, breeding, and high stress situations
- ▶ Contains powerful, whole food antioxidants, vitamins, minerals and hormones potentiated by massive amounts of live enzyme activity

Health & Weight Maintenance

Dear Springtime:

I am so glad I found you. My old horse pictured, is 34½ in this photo. I recently ran out of **Springtime Bee Pollen** for him and thought, oh well, he's on pasture part of the day. But in just a couple of months, he lost weight! We reordered our **Springtime** products, which I am sure he will be grateful for. It definitely made a difference in him initially, and taking him off of it was not to his benefit. He'll get this product for the rest of his life.

Thank you from my animals!

Vicki Beppler, Wisconsin

Vicki's horse is looking healthy. →

BEE POLLEN™

SIZE	SCOOPS	COST PER SCOOP	COST PER LB.	TOTAL
10 lb.	64 days	\$1.48	\$9.50/lb.	\$95.00
27.5 lb.	176 days	\$1.33	\$8.50/lb.	\$233.75
55 lb.	352 days	\$1.25	\$8.00/lb.	\$440.00

DIRECTIONS: Give one scoop (≈ 2½ oz. – density varies from batch to batch) daily per 1,000 lb. horse. For best results, start out with just a sprinkle for the first few days and increase gradually to at least one full scoop per day. Dosage may be doubled for performance, breeding or high stress situations.

The Long-Living Live Factors of Bee Pollen

You might not guess by looking at it, but pollen contains living cells within each grain. These are the powerful cells that give life to the next generation of plants, and they are packed with live enzymes and co-enzymes that make bee pollen so effective as a supplement. Live pollen cells are destroyed by heat; conversely, pollen can be preserved for vast periods of time with refrigeration. ♦

1) Scanning electron microscope image of pollen grains from a variety of common plants, showing their various sizes, shapes, and textures.

2) Pollen has been recovered from glaciers over 10,000 years old that is still alive and viable, making it the ideal live food supplement.

3) Reserve inventories of **Springtime Bee Pollen™** are stored in sub-zero frozen storage to maintain the highest potency.

Flowers, and thus pollen, are a natural food source of animals all over the world.

BEE POLLEN: A TRUE METABOLIC STIMULANT

Pollen contains a high concentration of living enzymes, which are absolutely essential to every biochemical function of the body.

Pollen contains greater concentrations of living enzymes than any other part of the plant. Scientists state that enzymes are absolutely essential for every biochemical function of the body. Enzymes are perhaps the most important of the health-giving plant factors. They are completely destroyed by high temperatures (130 degrees) – cooking! Enzymes are the essential triggers for the metabolic machinery of every living thing from daffodil to buffalo. The enzymes in raw foods are important because they help support the body's own enzyme systems. Enzymes are the life principle of every living cell.

Bee collected pollen comes from specific varieties of plants - which are not only the most nutritious, but also the least likely to cause problems from allergens.

Bee pollen has been our business for over 30 years. We choose batches that are bright and fresh, properly dehydrated, good tasting and clean. When received, we test each batch thoroughly for pesticides, heavy metals, biological contaminants, etc. Pesticide testing covers 132 different types and our raw materials must pass each and every test or we will not allow it into our products. The testing process generally takes up to 30 days to perform and there are very few companies in the industry that go to these lengths! ◆

Each hand-picked batch of multi-colored **Springtime Bee Pollen™** is made from multiple varieties, thus providing a wide-spectrum assortment of essential nutrients.

C-Complex™

A full spectrum of accessory nutrients to support horse health.

C-Complex™ is a powerful vitamin C formula, enhanced with bioflavonoids and nutrient rich bee pollen. It's excellent for immune support, promoting tissue, tendon and ligament health, and as an anti-inflammatory.*

- ▶ Fully supported vitamin C with bee pollen
- ▶ Powerful antioxidant
- ▶ Promotes connective tissue, tendon, and ligament health*
- ▶ Strengthens immune system*
- ▶ Aids anti-inflammatory response*

Pre-Event: Mix two heaping spoonfuls into feed the evening before and the morning of event.

Oprah no longer coughing!

Dear Springtime:

No More Heaves!

Due to the drought, heat and dusty conditions in our part of the country, my favorite horse, a 19-year-old Tennessee Walking Horse mare, Oprah, developed a severe case of heaves. We tried syrups, shots, medications, wetting her hay, and every remedy we could find — to no avail.

I received one of your catalogs and decided to try the **Breather Powder**, along with the shots and cough syrup for about a month. She stopped heaving and coughing. So we stopped giving her anything but the **Breather Powder**. You would never know she had the heaves. I consider it a life-saver. Thank you so much for your products.

Darlene Brown, Ohio

GUARANTEED ANALYSIS (per lb.)	
DMG (N,N-Dimethylglycine HCL)	89,600 mg
<i>Ingredients: diatomaceous earth (anti-caking), sucrose, DMG (N,N-Dimethylglycine HCL).</i>	

DIRECTIONS:

Daily: Feed 1 rounded spoonful (≈ 1,200 mg of pure DMG). Dose may vary from horse to horse.

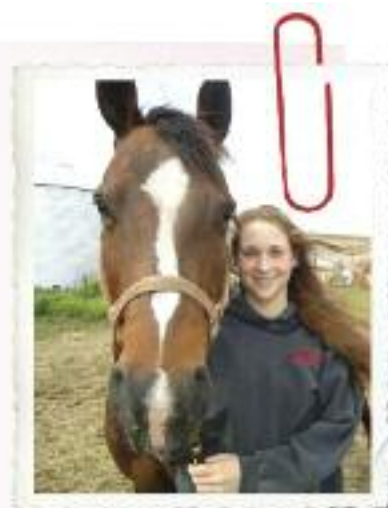

Pre-Event: Mix 2 heaping spoonfuls into feed the evening before and the morning of event.

Dear Springtime: **"...I have my old horse back!"**

Over the past two or three years my mare has developed a cough and wheeze. Last year, it was so bad that I was worried she would have to face a very early retirement. If she had to strain herself at all, she would start coughing and have to stop and rest.

I tried nearly everything I could think of, then **DMG 5,600** was recommended to me. Since she has been on it, she has made a complete turn-around. She has **NEVER** looked or felt better, and I have my old horse back! Thank you!

Ingredients: chondroitin sulfate (bovine cartilage extract - min. 90% purity), fructose, carrot powder, microcrystalline cellulose, glucosamine HCL (99%), MSM (99%), stearic acid, ascorbic acid (vitamin C), citrus bioflavonoid complex (40%), hesperidin (85%), and rutin (vitamin P).

"...she is not in pain anymore."

Dear Springtime:

Last spring, Azalee was in so much pain I could not ride her unless given butazone. She was diagnosed with joint problems in both hocks, her back and a bad knee at the right leg! I did not think I could get such results with the **Joint Health Treats**. Her lameness is barely visible and I feel she is not in pain anymore. She enjoys playing Horseball more than ever and no more bute for her. Thank you very much.

Marie Nadeau, Canada

Marie & Azalee back in the game they love!

GL™ 99% pure glucosamine HCL for joint health

Springtime GL™ is a naturally sweet tasting supplement that can be used by itself or along with **J-Flex Concentrate™** as an anti-inflammatory and joint lubricant.*

"...we have not had any colds or viruses."

Dear Springtime:

What another great product. Since my husband and I have been taking **Spirulina Tablets**, we have not had any colds or viruses. I volunteer at a nursing home with my dog, Jacob. During cold and flu season, when every resident is ill, my immune system seems to be at its peak. I attribute this to your product, **Spirulina Tablets**. I used to come down with four to six colds every year along with two virus attacks, now I have none!

Since it has worked so well for my husband and myself, I now feed **Spirulina Wafers** to my four dogs. Keep up the great products.

"...I enjoy my life again!"

I have fibromyalgia, degenerative disc disease, and frequent migraines. I would wake up from pain, and try to manage the household while in pain all day. My social life was at a standstill. At Christmas time, I tried **Boswellia Extract** tablets. I can't believe the difference in my life. My migraines are limited. I can actually go out and shop in a store, instead of being stuck in the house. The pain also is at a minimum, and I enjoy my life again! I can now get up at my leisure without pain, take care of my home in moderation, and feel so good again! Thank you, **Springtime!**

SPRINGTIME, INC.

“Joint Health Capsules have made a big difference in my quality of life.”

Dear Springtime:

I am 48 years old and have a family history of arthritis. I started having pain in my hips about a year ago. I got really scared when I started having difficulty walking on vacations. I knew I needed to do something before it got so bad that I could no longer maintain my active lifestyle. I started taking **Joint Health Capsules**, and after about three weeks, I was nearly pain free. Now, I take **Joint Health Capsules**, exercise regularly, eat healthy, and get plenty of sleep. **Joint Health Capsules** have made a big difference in my quality of life.

Kelly Vahey, Maryland

Kelly can be as active as she wants!

Linda is not "creaking" anymore!

Joint No Longer Creak

Dear Springtime:

I've been using **Joint Health Capsules** for myself. I soon found out that I had stopped making the "old person creaking noise" when getting into the cart, because I'm not so stiff

“I can't wait to try other products from Springtime...”

in the joints. I've been walking four miles a day with my hubby and out-striding his steps.

I can't wait to try other products from **Springtime** to make life even better!

Sincerely,

Linda Shackelford, Maryland

Springtime

CoQ10™

Supports healthy heart function and helps the body burn fat.

Concentrated in the heart, CoQ10 (coenzyme Q10) is prescribed worldwide as a tonic for heart function. It also aids the transformation of food into adenosine triphosphate, or ATP, the energy our bodies run on.*

- ▶ Burns fat into energy—supports weight loss*
- ▶ Counteracts aging*
- ▶ Powerful antioxidant, metabolic and immune stimulant*
- ▶ Supports normal heart function*
- ▶ Increases energy and helps prevent fatigue*
- ▶ Perfectly complementary to **Tonic Blend™**

GUARANTEED ANALYSIS (per softgel)

Coenzyme Q10 (ubiquinone)	100 mg

Weight Loss with CoQ10

CoQ10 group lost 30 lbs. in 9 weeks.

Good news! Clinical studies show that there may be a link between successful weight loss and CoQ10. Scientists have found that CoQ10 is an essential compound required in the breakdown of fat into energy. In one study, nine individuals were given 100 mg of CoQ10 a day (five of which had low levels of CoQ10) along with a low calorie diet. Nine weeks later, subjects with low CoQ10 had lost 30 lbs, while those with initially normal levels of CoQ10 lost only 13 lbs. From these results, scientists noted that perhaps 50% of overweight individuals may have low levels of CoQ10. A supplementation of 100 mg of CoQ10 daily, along with a low calorie diet and exercise program, may accelerate weight loss. ◆

L. van Gaal et al. "Exploratory Study of Coenzyme Q10 in Obesity," Biomedical and Clinical Aspects of Coenzyme Q, Vol. 4 K. Folkers and Y. Yamamura [eds.], (Amsterdam: Elsevier Science pub., 1984), pp. 369-73.
